

NEW: Sales launch of new weatherproof VoIP telephones wST-IP & wFT3-IP

Dear business partner,

AUER is launching two new weatherproof VoIP telephones. Both models, wST-IP and wFT3-IP are available from 01.04.2015 onwards. More VoIP models will follow in the course of the year.

Benefits of VoIP

From now on, and in addition to our regular analogue explosion proof and weatherproof telephones, we also offer you weatherproof VoIP (Voice over Internet Protocol) telephones for indoor and outdoor use. Unlike analogue telephones, these new VoIP models operate over the internet.

Two major reasons / motivations to use VoIP

- Lower maintenance and operating costs
- Increased functionality

VoIP enables you to:

- Easily extend your phone system as needed (plug&play)
- Have one phone number which rings multiple devices
- Easily install and maintain your phone network via web-interfaces
- Have a single network for voice and data, simplifying management and reducing costs
- Do a lot more!

Your Signalling Solution!

NEW: wST-IP / IP-Telephone for Indoor and Outdoor Use

- IP 66 protection class as per IEC60529
- Ambient temperature range -40°C to +70°C
- Ring signal ≥ 95 dB(A) at a distance of 1 m
- Pixel-based illuminated and heated LCD display
- V4A alphanumeric keypad
- Web based monitoring (operating, handset, hands free, ringing)
- Intelligent, user friendly menu structure
- Standard protocols H.323, SIP, TSIP, SIPS
- Power supply: Power over Ethernet (PoE) or external supply
- Connection to 10/100-BASE-T Ethernet
- Hands free communication
- Available in red and black (NEW: Red color is also available for the analogue version!)

The new wST-IP is the ideal unit for all kinds of weather conditions at a wide variety of very diverse facilities – whether sea water, high humidity or extreme mechanical demands. The housing is made of impact and shock resistant fiberglass-reinforced polyester. Even acids, alkalis or lubricants have no effect on the housing. Its robust design offers perfect protection to meet the latest requirements in outdoor applications. With a variety of functions and practical features, like an illuminated and heated display, the wST-IP supports efficient work with high comfort.

It also supports all features of the H.450 standard. The wST-IP offers high-quality features based on industry standards and our decades of experience.

The telephone can also be used using the integrated hands free communication function or can be used with the practical headset available as an accessory.

NEW: wFT3-IP / IP-Telephone for Indoor and Outdoor Use

- Protection degree IP 65 acc. to IEC60529
- Ambient temperature -20 °C to +60 °C
- Call tone ≥ 95 dB(A), 1 m
- Pixel-based, illuminated LCD Display
- Illuminated keypad
- Intelligent and user-friendly menu structure
- Standard H.323, SIP, TSIP, SIPS protocols
- Power supply Power over Ethernet (PoE)
- Connection to 10/100-BASE-T Ethernet LAN, RJ-45
- Available in colors yellow, red, grey and black
